Washington, D.C. 20505

23 December 1986

Mr. Phil Bowen
Fairbank Highway Research Station
6300 Georgetown Pike
McLean, VA 22101

Dear Phil:

As you are aware, we have completed installation of the new fence in our West A Parking Area. This allows us to return that portion of property which the Federal Highway Administration allowed us to use as a temporary parking area. You may use this area immediately. We believe that this action fulfills the requirement of the Memorandum of Understanding between our Agencies for us to return this property by 31 December 1986.

We understand that you are in the process of making arrangements to run a power line out to the light poles in the area returned to you. We will provide power to those poles until your work is complete or until we remove our lighting service at West A lot, whichever comes first. Please contact us when you are ready to disconnect the lights from our circuit so that we might make arrangements for continuity of service to the West A area.

Sincerely,

Chief, New Building Project Office
